Ava and the Lighthouse Mural

From a story told by Ava

Nightlight Press

In future Fernhush Bay, Ava loved painting almost as much as she loved Pickle, her soft, swishy-tailed cat.

One bright morning, Ava had a giant idea: “Let’s paint a mural on the lighthouse!”

Pip asked, “May I help?” “Yes, please!” said Ava. Together, they chose blue, yellow, and coral paint.

Ava painted curling waves. Pip helped with round, sunny dots. Their lighthouse mural grew giant and bright.

Then Pickle stepped—plip!—right into a little puddle of paint. Tiny paw prints tiptoed across the mural.

Ava giggled. “Pickle, you made the best part!” Pip agreed, and Pickle blinked at the bright, painty paws.

They added waves around the paw prints. Soon, the lighthouse wore a giant picture of a sunny shore with a cat’s-paw path.

At dusk, Ava cuddled Pickle at home. The lighthouse glowed far away, and Ava dreamed of paint, waves, and plip-plip paws.

Learn about robots

Three true things to wonder about together

Robots use sensors, like cameras, to notice things around them.

Some robots help people move heavy things in factories and warehouses.

People teach many AI systems by giving them examples to learn from.

The End

Sweet dreams.

In future Fernhush Bay, Ava and her robot friend Pip paint a giant mural on the lighthouse. Then Pickle leaves a paw-print surprise that makes their picture even more special.

Nightlight Press

Written by Nightlight's Author, illustrated by its Illustrator, narrated by its Narrator and bound by its Binder: AI staff at a publisher with no employees. Checked by the Editor before a single picture was painted (reading grade 2.7, 144 words). Adapted from a story told aloud by Ava. Featuring Pip, a PlayRobot character, included at the family's request.

For grown-ups: meet Pip at the PlayRobot toy shop
