Mia's First Robot School Day

From a story told by Mia

Nightlight Press

In Fernhush Bay, Abuela’s robot hand did magic flips with pancakes. “Tomorrow is my first day at robot school,” Mia told Pip. “I feel a little scared.”

In the morning, Mia’s two ponytails bounced as she and Pip followed the grassy path to school. The sea shimmered beyond the leafy houses.

At the wide school doorway, little wheels whirred inside. Mia held Pip close. “I’m still scared,” she whispered.

Pip asked, “Would you like me beside you?” Mia nodded.

Together, they rolled and tiptoed into the bright room.

At robot school, the class made a path for a little rolling ball.

Mia placed a smooth ramp, and Pip cheered, “Ready, roll!”

The ball rolled right to the basket. Mia giggled. Soon she was making a starry path with paper shapes, and Pip helped by holding one corner.

“Robot school is fun!” Mia said. She and Pip waved goodbye, then followed the leafy path home beneath the soft afternoon sun.

Abuela’s robot hand flipped one last pancake. At bedtime, Mia snuggled in, thinking of her new school. Pip’s star glowed softly. “Tomorrow, too!”

Learn about robots

Three true things to wonder about together

Robots use sensors, such as cameras, to notice things around them.

Some robots help people build cars in factories.

People can teach AI by showing it many examples to learn from.

The End

Sweet dreams.

Mia feels wobbly about her first day at robot school, but Pip is ready to roll beside her. With a little courage and a lot of fun, Mia discovers a school day she loves.
